

WAS SOLVE LATIMER MYSTERY

HINT OF DISTRICT ATTORNEY CLARKE IN THE MURDER CASE

W. H. Tutthill, friend of the murdered man, makes a statement of his relations with Mrs. Latimer, who was charged with the murder of her husband.

The second day's session of the coroner's inquest in the case of Albert C. Latimer, who was shot in his home, 318 Hancock street, Brooklyn, by a burglar about 2 o'clock on the morning of July 2, was held yesterday afternoon at the request of District Attorney Clarke, who is conducting the inquiry on behalf of the police. Mr. W. H. Tutthill, who figured disagreeably in former testimony with regard to his attentions to his friend's wife, Mrs. Sadie Latimer; Mrs. Latimer herself and a number of other witnesses had testified, and began to look as though the long-drawn-out proceedings were actually near their end when Mr. Clarke turned to Coroner Williams and asked for an adjournment, saying:

"For reasons which I have already explained to the coroner, and which the coroner understands, I would request that the inquest now go over until 10 o'clock tomorrow morning."

Coroner Williams fixed the place for today's hearing in one of the rooms of the County Court House instead of in the Brooklyn Borough Hall, where the examinations of last Thursday and of yesterday were held. Mr. Clarke resolutely refused to say what it was he had told the coroner as a reason for asking the adjournment, and the coroner himself confined his statements to vague generalities when asked the same question.

In a case such as this, where all sorts of rumors and fabrications have sprung up like mushrooms in all directions and on no particular foundation, such action as this naturally brought a new and luxuriant crop of yarns and surmises. It was learned, however, that a number of suspicious had been issued for news purposes, and although he firmly refused to tell on what he based the remark, District Attorney Clarke said that they were in hope that they would clear the case up yet.

The former Alderman Chamber in the City Hall was even more densely packed at the examination yesterday than on Thursday, when the inquest began. Every seat was filled, and a great number of people were standing wherever they could see themselves. Owing to the astonishing number of mysterious hints and insinuations, to say nothing of flat-footed falsehoods, which have been injected into the case from the start, there has been developed a widespread and intense interest in this story of housebreaking and murder.

The fact that the husband of Mrs. Latimer was a well-known and successful business man, and that he had been in the habit of carrying on his business in the City Hall, had been a factor in the case from the start. The fact that he had been in the habit of carrying on his business in the City Hall, had been a factor in the case from the start. The fact that he had been in the habit of carrying on his business in the City Hall, had been a factor in the case from the start.

Mr. Tutthill was the figure of most interest in yesterday's proceedings. He is a dapper sort of man, with hair parted in the middle, and a prominent nose. He is a well-known figure in the City Hall, and has been in the habit of carrying on his business in the City Hall, had been a factor in the case from the start.

BELMONT COMPANY TO GET IT

BID FOR TWO BROADWAY TUNNELS LIKELY TO WIN

Brooklyn Wants the Money Saved Spent on More Tunnel Facilities for Brooklyn, Not for the East Side of Manhattan—Grout Inclined to Take That View

While the members of the Rapid Transit Commission would not commit themselves yesterday, enough was gleaned from them to make it reasonably safe to predict that the proposal of the Belmont-McDonald syndicate to construct the tunnel under the East River and to build a subway along Broadway from Union Square to Forty-second street for \$100,000,000, including the purchase of terminals and real estate, will be accepted by the city.

Already it is looked upon as so certain that the Belmont-McDonald company will get the contract that a movement is being formed in Brooklyn to have a delegation attend the public hearing to be held by the Rapid Transit Commission on Thursday, not exactly to oppose the granting of the franchise to the Manhattan company, but to insist that the money saved by the low bids of the contractors for the subway in this borough shall be devoted to building another tunnel to Brooklyn.

In his letter to the Rapid Transit Commission on Monday, Mr. McDonald suggested that the margin of saving between his bid and the sum set aside by the authorities for the tunnel might be used to being used for the construction of a subway along the East Side of the city. The Brooklynites, however, will contend that the money that was to have been spent on their borough should not be used for Manhattan.

Comptroller Grout appears to be inclined to favor this view. When he was asked yesterday if the four or five million dollars saved on the Brooklyn tunnel would mean the proposed plan for the suggested East Side route, he said: "There is no possibility of such a project being contemplated this year at least, and, besides, I think that Brooklyn is entitled to some consideration. Four tracks were promised to the people of that borough. The plan for the new tunnel provides for only three tracks, and it is being only fair that the saving on the present contract should go to building a second tunnel to Brooklyn."

Expressing his gratification at the lowness of the bids and upon the fact that the franchise would run for only thirty-five years instead of fifty, Mr. Grout said: "I am not going to discuss the merits of the bids until I have had a chance to look at them. I am not going to discuss the merits of the bids until I have had a chance to look at them. I am not going to discuss the merits of the bids until I have had a chance to look at them."

President Baldwin of the Belmont-McDonald syndicate, who is in charge of the project, said yesterday that he was not going to discuss the merits of the bids until he had had a chance to look at them. He said: "I am not going to discuss the merits of the bids until I have had a chance to look at them. I am not going to discuss the merits of the bids until I have had a chance to look at them."

John L. Wells, counsel for the B. R. T. Company, said yesterday in answer to Borough President Sweeney's attack on the different plans of the Belmont-McDonald syndicate, that the company was not going to discuss the merits of the bids until he had had a chance to look at them.

Widow's Lawyer Protests Against Admission of Death of Deceased. The will of Albert C. Latimer, who died in St. Mary's Hospital on July 9 from pistol shots fired by an intruder in his home on the morning of July 2, was filed in Brooklyn yesterday. With the will was a petition of Mr. Egbert K. Van Buren, Mr. Latimer's legal adviser, which, after reciting that the will was made in Manhattan on April 10, 1925, and that the testator was sane and of sound mind, it requested the court to admit the will to probate.

Mr. Van Buren's petition, which was filed in the Surrogate's Court, requested the court to admit the will to probate. He said: "I am not going to discuss the merits of the bids until I have had a chance to look at them. I am not going to discuss the merits of the bids until I have had a chance to look at them. I am not going to discuss the merits of the bids until I have had a chance to look at them."

CROPS TOO WET OR TOO DRY

Executive Board in the Middle Western Valley—Drought in the South

Washington, July 22.—The weekly crop report issued by the Weather Bureau today gives the following general summary:

The lower Missouri and upper Mississippi valleys and Lake region have continued to suffer from excessive rains, which have also interrupted farm work in the Ohio Valley, and portions of the Middle Atlantic States and New England. Much injury to crops and other property has resulted from overflows in Iowa and portions of Illinois, Missouri and Michigan. Drought has been largely relieved in the Southern States, but extensive areas in that section are still much in need of rain, especially in the northern portions of the Carolinas. The temperature conditions as a whole have been favorable, although rather low in the northern Rocky Mountain districts. The north Pacific coast States sustained considerable damage from high winds and the Dakotas and Minnesota from hailstorms in scattered localities.

The corn crop has made splendid progress in the States of the central valleys, except in Iowa and limited portions of Missouri and Illinois, the condition of the crop in Iowa being fairly good on well-tilled uplands, but great damage has resulted from floods on the river bottoms of the southern and eastern portions of that State and in northern Illinois. Highly favorable reports are received from Nebraska, Kansas, Oklahoma and Oklahoma Territory. The temperature conditions as a whole have been favorable, although rather low in the northern Rocky Mountain districts. The north Pacific coast States sustained considerable damage from high winds and the Dakotas and Minnesota from hailstorms in scattered localities.

Rains have interfered with the harvesting of winter wheat where unfurnished in the extreme northern districts, and have also been unfavorable for threshing in the central valleys. In the lower Missouri Valley has been damaged. Harvesting continues in California and has begun in Oregon, where wheat is fairly good. In Idaho, Utah and Washington has, however, sustained considerable damage from recent high winds. Spring wheat has advanced favorably in the principal spring wheat States, but has sustained injury in scattered localities from hailstorms.

That based on the fact that the Southern States and is in progress in the central valleys, and while lodging is extensively reported in Georgia, Oklahoma, Missouri and Mississippi valleys, and Lake region the general condition of the crop continues satisfactory. The corn crop has made splendid progress in the States of the central valleys, except in Iowa and limited portions of Missouri and Illinois, the condition of the crop in Iowa being fairly good on well-tilled uplands, but great damage has resulted from floods on the river bottoms of the southern and eastern portions of that State and in northern Illinois. Highly favorable reports are received from Nebraska, Kansas, Oklahoma and Oklahoma Territory. The temperature conditions as a whole have been favorable, although rather low in the northern Rocky Mountain districts. The north Pacific coast States sustained considerable damage from high winds and the Dakotas and Minnesota from hailstorms in scattered localities.

Apple prospects are somewhat improved in Missouri and promise well in portions of the central valleys, and in the Ohio Valley and Middle Atlantic States the indications are for a very poor crop. Haying has been interrupted and much of the hay crop has been lost. The lower Missouri and upper Mississippi valleys and portions of the Lake region.

One paragraph of the Louisville dispatch stated that the Louisville and Nashville conformity with the Kentucky State constitution had been brought about through the intervention of the part of J. Pierpont Morgan to merge all of the leading Southern railways into one system under the control of a Southern securities company. This merger, according to current reports, would include the Southern Railway system, the Atlantic Coast Line, the Louisville and Nashville, and the Tennessee Valley Railroad system. The Louisville and Nashville Railroad system, the Atlantic Coast Line, the Louisville and Nashville, and the Tennessee Valley Railroad system. The Louisville and Nashville Railroad system, the Atlantic Coast Line, the Louisville and Nashville, and the Tennessee Valley Railroad system.
